

<b>Unified name</b>	<b>Old Android name</b>	<b>data type</b>	<b>Description</b>
g_annot_highlight_clr	highlight_color	int (hex)	Changes the color of highlight annots
g_annot_lock	g_annot_lock	boolean	Enable/Disable annot locked property
g_annot_READONLY	g_annot_READONLY	boolean	Enable/Disable annot readonly property
g_annot_squiggly_clr	squiggle_color	int (hex)	Changes the color of squiggle annots
g_annot_strikeout_clr	strikeout_color	int (hex)	Changes the color of strikeout annots
g_annot_transparency	highlight_color	int (hex)	Changes annotations' transparency
g_annot_underline_clr	underline_color	int (hex)	Change underline annot's color
g_annot_def_author	sAnnotAuthor	string	if valorized, will be used to set the annotation author while its creation
g_auto_launch_link	g_auto_launch_link	boolean	if true the link action will be performed immediately otherwise the user must click on the play button
g_case_sensitive	g_case_sensitive	boolean	Enable/Disable case sensitive on searching
g_dark_mode	dark_mode	boolean	Changes the reader mode to dark
g_hand_signature	sEnableGraphicalSignature	boolean	Enable/Disable signature annot management
g_fake_sign	bFakeSignature	boolean	Use the builtin certificate to apply the signature
g_exec_js	sExecuteAnnotJS	boolean	Enable/Disable JS annot's execution
g_find_primary_color	findPrimaryColor	int (hex)	Changes the color of the selected find item
g_find_secondary_color	findSecondaryColor	int (hex)	Changes the color of the selected find item
g_highlight_annotation	highlight_annotation	boolean	Enable/Disable highlighting annotation on selection
g_ink_color	inkColor	int (hex)	Changes the color of ink annots
g_ink_width	inkWidth	float	Changes the width of ink annots
g_line_annot_fill_color	rect_annot_fill_color	int (hex)	Changes line annot's fill color
g_line_annot_style1	line_annot_style1	int	Change line annot style for start point
g_line_annot_style2	line_annot_style2	int	Change line annot style for end point
g_line_annot_color	line_annot_color	int (hex)	Change line annot's color
g_line_annot_width	line_annot_width	float	Change line annot's width
g_match_whole_word	g_match_whole_word	boolean	Enable/disable matching whole word on searching
g_navigation_mode	navigationMode	int	navigation mode, 0:thumbnail view 1:seekbar view
g_oval_annot_color	ellipse_annot_color	int (hex)	Change ellipse annot's color
g_oval_annot_width	ellipse_annot_width	float	Change ellipse anno's width
g_oval_annot_fill_color	ellipse_annot_fill_color	int (hex)	Chages ellipse annot's fill color
g_readerview_bg_color	readerViewBgColor	int (hex)	Changes reader view's background color
g_rect_annot_fill_color	rect_annot_fill_color	int (hex)	Changes rect annot's fill color
g_rect_annot_color	rect_annot_color	int (hex)	Changes rect annot's color
g_rect_annot_width	rect_annot_width	float	Changes rect annot's width

g_view_mode	def_view	int	Defines the view of the reader 0: vertical 1: horizontal 2: scroll 3: single page 4: single extended 5: reflow 6: single page, 2 pages in landscape
g_render_quality	render_mode	int	Defines the render quality 0 : draft 1 : normal 2 : best
g_auto_save_doc	g_save_doc	boolean	Automatically save the document on close.
g_sel_color	selColor	int (hex)	Changes the selection color
g_layout_rtol	rtol	boolean	right to left navigation (both CPU and opengl on Android)
g_sel_rtol	selRTOL	boolean	Defines if the text selection starts from right to left or the opposite
g_use_sel_icons	useSelIcons	boolean	Use selection icons (markers).
g_auto_scale	fit_different_page_size	boolean	keep same page width or same height, depends on view mode, different scale value for each page, this same to fit_different_page_size on Android
g_thumbview_bg_color	thumbViewBgColor	int (hex)	Defines thumbview background color
thumbGridBgColor	thumbGridBgColor	int (hex)	Thumb grid view's background color
g_thumbview_height	thumbViewHeight	int	Defines thumbview height
g_save_thumb_in_cache	save_thumb_in_cache	boolean	Save thumbnails images to static cache
g_cache_enable	cacheEnabled	boolean	Use page cache during the rendering
g_layout_zoom_level	layoutZoomLevel	float	zoom level for layout
g_view_zoom_level	zoomLevel	float	zoom level for deprecated PDFView(Android only)
g_zoom_step	zoomStep	float	Defines the double tap zoom step
g_layout_zoom_clip	layoutZoomLevelClip	float	Define the size of tiles
